RESOLUTION TITLE (limited to 5 words): Preserve Minnesota natural spaces

BE IT RESOLVED THAT:

Support accelerated action to protect, restore, and improve management of forests, prairie, and wetlands to fight climate change and preserve natural places for people and wildlife.

- According to the UN Global Framework for managing nature, at least 30% of land and sea areas globally (especially areas of particular importance for biodiversity and its contributions to people) must be conserved through effective, equitably managed, ecologically representative and well-connected systems of protected areas (and other effective area-based conservation measures)
- We support accelerated action by the State of Minnesota to achieve our fair share of this global target and to put Minnesota on track to achieve its greenhouse gas emissions goals.
- This effort includes but is not limited to expanding forest lands, protecting peat lands, buffering surface waters via DNR easements and other means, and restoring meaningful acres of tall grass prairie, and expanding parks and green spaces in our cities and towns.
